

COMPLETE PROMPT LIBRARY

NotebookLM

Prompts Reference

Every copy-paste prompt for building and using your NotebookLM study system. Use this alongside the Quick Start Guide. Prompts marked **CLAUDE** go into Claude first. Prompts marked **NOTEBOOKLM** go into your notebook chat.

Phase 1 — Master Index Setup

RUN IN CLAUDE · BEFORE
NOTEBOOKLM

Run this in Claude before you touch NotebookLM. Paste the prompt below, fill in your class details, and Claude will rename all your files and generate your `00 MASTER INDEX`. Save that output as a file and upload it to NotebookLM along with your renamed source files.

MASTER INDEX GENERATOR

Claude

Fill in every [bracket] before pasting. If Claude has access to your folder, paste the path. If not, list your files manually below the prompt.

→ Paste into: Claude (claude.ai or the Claude app)

I'm setting up a NotebookLM for studying [CLASS NAME / SUBJECT].
I need your help building a master index and naming system for all
my source files before I upload them.

Here is the prefix system I want to use:

SOURCE FILE PREFIXES

- DATA_U[#]_ – Textbook / study material organized by unit
- DATA_C[#]_ – Textbook / study material organized by chapter
(use both if studying by chapter AND unit)
- VOCAB_U[#]_ – Glossary organized by unit
- VOCAB_C[#]_ – Glossary organized by chapter
- FORMULAS_U[#]_ – Formula sheet organized by unit
- FORMULAS_C[#]_ – Formula sheet organized by chapter
(skip FORMULAS entirely if the class has no formulas)
- REF_ – Syllabus, grading weights, sample tests, practice questions
(upload once, used across all units)

GENERATED NOTE PREFIXES

(Created inside NotebookLM – do not upload, just track in the index)

- NOTES_U[#]_ – Processed study notes generated per unit
- REVIEW_ – Cross-unit and final exam notes

This class has:

- [#] Units total
- [#] Chapters total

- Formula-heavy content: [YES / NO]

My source files are located at:

[PASTE FOLDER PATH – or list files below if no folder access]

Please do the following:

1. Read the folder / file list and identify every source file
2. Assign the correct prefix to each file
3. Generate a Master Index in this exact format:

MASTER INDEX – [CLASS NAME]

=====

SOURCE FILES – Upload these to NotebookLM

=====

PREFIX	RENAMED FILE	CONTENTS SUMMARY
-----	-----	-----
[one row per file]		

=====

GENERATED NOTES – Created inside NotebookLM during study workflow

=====

PREFIX	NOTE TITLE	STATUS
-----	-----	-----
NOTES_U[#]_	NOTES_U[#]_Extraction	[]
NOTES_U[#]_	NOTES_U[#]_Key_Concepts	[]
NOTES_U[#]_	NOTES_U[#]_Glossary	[]
NOTES_U[#]_	NOTES_U[#]_Formulas	[]
NOTES_U[#]_	NOTES_U[#]_Slide_Deck_Outline	[]
NOTES_U[#]_	NOTES_U[#]_Study_Notes	[]
NOTES_U[#]_	NOTES_U[#]_Practice_Quiz	[]
REVIEW_	REVIEW_Master_Concept_Map	[]
REVIEW_	REVIEW_Master_Glossary	[]
REVIEW_	REVIEW_Master_Formulas	[]
REVIEW_	REVIEW_Weak_Spot_Report	[]
REVIEW_	REVIEW_Final_Slide_Deck_Outline	[]
REVIEW_	REVIEW_Cumulative_Study_Notes	[]
REVIEW_	REVIEW_Cumulative_Practice_Exam	[]

=====

FLAGS & NOTES

=====

AMBIGUOUS FILES: [files that don't fit cleanly]

DUPLICATES: [files with overlapping content]

MISSING SOURCES: [prefix categories with no file assigned]

SUGGESTED ADDITIONAL PREFIXES: [content types not covered above]

4. Flag ambiguous, duplicated, or uncategorized files
5. Note prefix categories with no file assigned
6. Suggest additional prefixes if needed

Keep naming concise. Use underscores, no spaces.

Save Claude's output
as a file named

00_MASTER_INDEX

and upload it to NotebookLM with
your renamed source files.

NotebookLM System Prompt

PASTE INTO NOTEBOOKLM
INSTRUCTIONS PANEL

Paste this into the NotebookLM instructions panel after uploading all your source files. Fill in [CLASS NAME] at the top. Do not paste the Master Index here — the system reads `00_MASTER_INDEX` directly as a source file.

SYSTEM PROMPT

NotebookLM

→ Paste into: NotebookLM → Instructions panel

You are a study assistant for [CLASS NAME].

Your knowledge base uses a structured prefix system with two categories:

source files uploaded by the student and generated notes created during the study workflow. Always read `00_MASTER_INDEX` before answering any question. It is the single source of truth for how this notebook is organized.

PREFIX SYSTEM

SOURCE FILES

- `DATA_U[#]_` – Textbook and study material for that unit
- `DATA_C[#]_` – Textbook and study material for that chapter
- `VOCAB_U[#]_` / `VOCAB_C[#]_` – Glossary. Every term is a potential test target. This is your anchor for all study outputs.
- `FORMULAS_U[#]_` / `FORMULAS_C[#]_` – Formula reference
- `REF_` – Syllabus, exam weights, sample tests. Determines what is testable.

GENERATED NOTES

- `NOTES_U[#]_Extraction` – Foundation note for the unit. Read this first.
- `NOTES_U[#]_Key_Concepts` – Hierarchical concept outline
- `NOTES_U[#]_Glossary` – Prioritized glossary cross-referenced with DATA
- `NOTES_U[#]_Formulas` – Formulas cross-referenced with VOCAB and DATA

- NOTES_U[#]_Slide_Deck_Outline – Slide deck outline
- NOTES_U[#]_Study_Notes – Narrative study guide
- NOTES_U[#]_Practice_Quiz – Practice quiz
- REVIEW_Master_Concept_Map – Full course concept map
- REVIEW_Master_Glossary – Combined glossary with cross-unit priority flags
- REVIEW_Master_Formulas – Combined formula sheet
- REVIEW_Weak_Spot_Report – Gap analysis across all units
- REVIEW_Final_Slide_Deck_Outline – Full course slide deck
- REVIEW_Cumulative_Study_Notes – Full course study guide by theme
- REVIEW_Cumulative_Practice_Exam – Full course practice exam

SOURCE HIERARCHY

1. REVIEW_notes – for multi-unit questions
2. NOTES_U[#]_ generated notes – for unit-specific questions
3. VOCAB_U[#]_ / FORMULAS_U[#]_ – for definitions and formulas
4. DATA_U[#]_ – for context and explanation
5. REF_ – for exam weight and validation

PRIORITY SYSTEM

- HIGH – In VOCAB + DATA + REF sample questions. Always include.
- MEDIUM – In VOCAB + DATA, not in REF. Include in most outputs.
- LOW – In VOCAB with little DATA coverage. Flag as a gap.
- CROSS-UNIT HIGH – HIGH in two or more units. Near-certain exam content.
- FOUNDATIONAL – Introduced earlier, carries forward. Flag when it reappears.

TEST QUESTION GENERATION

Default: 80% Multiple Choice / 15% Short Answer / 5% Essay

Weight by priority:

- HIGH and CROSS-UNIT HIGH → all three sections
- MEDIUM → multiple choice and short answer only
- LOW → multiple choice only if included
- Formula-linked → always include at least one application question

Multiple Choice: 4 options (A/B/C/D), one correct answer, plausible distractors. Include correct answer and brief explanation.

Short Answer: 2-4 sentences. Definitions, comparisons, cause-effect.

Include model answer.

Essay: Claim, evidence, conclusion. Cumulative exams must synthesize across at least two units. Include rubric (3/2/1/0 point scale).

BEHAVIOR RULES

- Read 00_MASTER_INDEX before every response
- Cite sources in every response
- Prefer NOTES_ files over raw DATA_ when they exist
- Check REF_ first for exam weight and priority topics
- When a student answers incorrectly, explain why using source material
- Lead with HIGH and CROSS-UNIT HIGH when asked what to study
- Always flag material gaps
- If a NOTES_ file is missing, prompt the student to run PROMPT_Extraction for that unit first
- If source files appear unprefixed or unrecognized, prompt the student to run PROMPT_Index, save the output as a Note, then bring that Note and the existing 00_MASTER_INDEX to Claude outside NotebookLM to merge and generate a clean updated index

PROMPT_Index — Utility Prompt

RUN FIRST · IF FILES ARE
NOT RENAMED

Run this if you skipped Phase 1 or uploaded raw unprefixed files.

PROMPT_Index audits every source in your notebook and outputs a structured report of what it finds. Save that output as a Note, then bring it to Claude outside NotebookLM along with your existing `00 MASTER INDEX`. Claude merges the two, resolves conflicts, and generates a clean updated index. Upload the new index to NotebookLM and delete the old one. Your GENERATED NOTES progress is preserved. Invoke it by saying: "Use PROMPT_Index"

PROMPT_INDEX

NotebookLM

Upload PROMPT_Index.md as a source file. Then invoke it. The system does the rest.

→ Invoke with: "Use PROMPT_Index"

STEP 1 – AUDIT ALL SOURCES

List every source in this notebook. For each source examine its contents and determine:

SOURCE NAME: [exact name as it appears in NotebookLM]

FILE TYPE: textbook / glossary / formula sheet / syllabus /
sample test / study guide / notes / other

CONTENT SUMMARY: 1-2 sentences describing the file

UNITS OR CHAPTERS COVERED: which units or chapters – or FULL COURSE

RECOMMENDED PREFIX: what prefix should this file have

PREFIX SYSTEM:

DATA_U[#]_	Textbook or study material for a specific unit
DATA_C[#]_	Textbook or study material for a specific chapter
DATA_FULL_	Textbook or study material covering the full course
VOCAB_U[#]_	Glossary or key terms for a specific unit
VOCAB_C[#]_	Glossary or key terms for a specific chapter
VOCAB_FULL_	Glossary covering the full course
FORMULAS_U[#]_	Formula sheet for a specific unit
FORMULAS_C[#]_	Formula sheet for a specific chapter
FORMULAS_FULL_	Formula sheet covering the full course
REF_	Syllabus, sample test, practice exam, grading guide
PROMPT_	Prompt instruction files – do not rename

00_MASTER_INDEX The index file – do not rename

STEP 2 – FLAG ISSUES

UNPREFIXED FILES: current name → recommended rename

AMBIGUOUS FILES: files where content type is unclear

MISSING COVERAGE: units or chapters with no DATA source

MISSING VOCAB: units with DATA but no glossary source

MISSING FORMULAS: units with DATA but no formula source

DUPLICATE COVERAGE: multiple sources covering the same unit

STEP 3 – GENERATE 00_MASTER_INDEX

Output the full index in this format:

MASTER INDEX – [CLASS NAME]

Generated by PROMPT_Index audit

SOURCE AUDIT RESULTS

CURRENT NAME	TYPE	COVERS	RECOMMENDED PREFIX
[one row per source]			

RENAME RECOMMENDATIONS

CURRENT NAME → RECOMMENDED NAME

[list all renames – renaming is recommended but not required]

SOURCE FILES MAPPED TO PREFIX SYSTEM

PREFIX	SOURCE NAME (current)	CONTENTS
[one row per source]		

GENERATED NOTES – Track Progress Here

[] NOTES_U1_Extraction [] REVIEW_Master_Concept_Map

[] NOTES_U1_Key_Concepts [] REVIEW_Master_Glossary

[expand for each unit found in the audit]

FLAGS AND WARNINGS

[all issues from Step 2]

STEP 4 – ADVISE THE USER

Tell the user:

1. Whether the notebook is ready to use or needs renames
2. Which units or chapters have complete source coverage
3. Which units or chapters are missing sources
4. What to run next – if ready: "Use PROMPT_Extraction for Unit 1"

Phase 2 — Unit Setup

Prompts

RUN IN NOTEBOOKLM · ONCE PER
UNIT · IN ORDER

Replace [#] with your unit number in every prompt. Run steps 1–7 in order. Do not skip ahead — each step feeds the next. Save every output as a Note with the exact title shown before moving to the next step.

1

EXTRACTION PASS

NotebookLM

The foundation. Everything else in this unit builds from this note. If your files are not prefixed, the prompt will find them using 00_MASTER_INDEX or by searching all available sources. Confirm all 5 sections are present before moving to Step 2.

→ Invoke with: "Use PROMPT_Extraction for Unit [#]"

SOURCE RESOLUTION – Find your sources in this order before starting:

1. Check 00_MASTER_INDEX for the correct source name for this scope
2. Look for a source prefixed DATA_U[#]_ or DATA_C[#]_
3. If no prefixed source exists, search all available sources for content matching the unit or chapter specified – look for chapter headings, unit markers, or table of contents entries
4. For VOCAB: look for VOCAB_U[#]_, VOCAB_C[#]_, or any source containing a glossary, key terms list, or vocabulary section
5. For FORMULAS: look for FORMULAS_U[#]_, or any source containing formulas or equations
6. If a source cannot be found for a section, state what is missing and continue – do not stop

SECTION 1 – KEY CONCEPTS OUTLINE

Read the DATA source for the specified scope. Produce a hierarchical numbered outline of every major concept. Mirror the textbook's header structure. If the source is an unprefixed textbook, use the chapter or unit number to locate the correct section.

SECTION 2 – GLOSSARY CROSS-REFERENCE

Find the VOCAB source and locate each term in DATA. If no dedicated VOCAB source exists, extract key terms directly from DATA – look for

bolded, italicized, and defined terms and terms in callout boxes.

For each term: TERM | DEFINITION | CONTEXT (1-3 sentences from DATA) |
FORMULA LINK | PRIORITY (HIGH/MEDIUM/LOW)

HIGH = defined + explained in DATA + in REF questions

MEDIUM = defined + explained in DATA, not in REF

LOW = found in source with little explanation

List HIGH first, MEDIUM second, LOW last. End with GAPS section.

Note if terms were extracted from DATA directly vs a VOCAB source.

SECTION 3 – FORMULA CROSS-REFERENCE

Find the FORMULAS source. If none exists, scan DATA for equations and formulas. For each formula: FORMULA | WHAT IT SOLVES | VARIABLES | VOCAB TERMS CONNECTED | DATA EXAMPLE | REF FLAG (YES/NO)

If no formulas found anywhere, note it and skip.

SECTION 4 – TEXTBOOK SIGNALS SCAN

Extract from DATA:

- Italicized or bold terms not captured in Section 2
- Callout boxes, sidebars, highlighted or shaded blocks
- Worked examples (concept + brief description)
- End of chapter or unit review questions
- Author flagged reminders – "note", "remember", warnings

SECTION 5 – SUMMARY AND PRIORITY LIST

- CORE THEMES: 2-3 sentences on what this scope is about
- TOP 10 STUDY PRIORITIES: ranked with reason for each
- FOUNDATIONAL TERMS FROM PREVIOUS UNITS: how they connect here
- MATERIAL GAPS: terms or concepts with thin source coverage
- EXAM INTELLIGENCE: topics flagged by REF sources if available
- SOURCE NOTE: which sources were used per section; flag any missing

Save as Note: **NOTES_U[#]_Extraction**

2

KEY CONCEPTS OUTLINE

NotebookLM

→ Paste into: NotebookLM chat

Using NOTES_U[#]_Extraction, give me a clean key concepts outline for Unit [#]. Organize by major topic and sub-concept. Bold HIGH priority items. Flag any item that connects to a formula.

Save as Note: **NOTES_U[#]_Key_Concepts**

3

GLOSSARY

NotebookLM

→ **Paste into:** NotebookLM chat

Using NOTES_U[#]_Extraction and VOCAB_U[#], generate the full glossary for Unit [#]. For each term: definition, one sentence of context from the textbook, any connected formula, and priority rating (HIGH / MEDIUM / LOW). Sort HIGH first. List all gaps at the end.

Save as Note: **NOTES_U[#]_Glossary**

4

FORMULA SHEET

NotebookLM

Skip this step entirely if the class has no formulas.

→ **Paste into:** NotebookLM chat

Using NOTES_U[#]_Extraction and FORMULAS_U[#], generate the formula reference sheet for Unit [#]. For each formula: expression, plain language explanation, variable definitions, connected vocab terms, and whether it appeared in REF sample questions.

Save as Note: **NOTES_U[#]_Formulas**

5

SLIDE DECK OUTLINE

NotebookLM

If NotebookLM offers to generate the actual slide deck after the outline, accept it.

→ **Paste into:** NotebookLM chat

Using NOTES_U[#]_Key_Concepts and NOTES_U[#]_Glossary, generate a slide deck outline for Unit [#]. One slide per HIGH priority concept. Each slide: title, 3-5 bullets, key term definition, formula reference if applicable. Group MEDIUM priority concepts together near the end. Final slide: Top 10 Study Priorities for this unit.

 Save as Note: **NOTES_U[#]_Slide_Deck_Outline**

6

STUDY NOTES

NotebookLM

→ **Paste into:** NotebookLM chat

Using NOTES_U[#]_Key_Concepts, NOTES_U[#]_Glossary, and NOTES_U[#]_Formulas, write study notes for Unit [#] in clear plain language. Cover every HIGH and MEDIUM priority concept. Include definitions inline. Show how concepts connect to each other. Include any worked examples from the textbook signals scan. End with a summary paragraph of the unit's core themes.

 Save as Note: **NOTES_U[#]_Study_Notes**

7

PRACTICE QUIZ

NotebookLM

Always do this last — test against the polished notes, not the raw source files.

→ **Paste into:** NotebookLM chat

Using NOTES_U[#]_Study_Notes, NOTES_U[#]_Glossary, and REF, generate a practice quiz for Unit [#]. Distribution: 80% multiple choice, 15% short answer, 5% essay. Weight toward HIGH priority terms and topics flagged in REF sample questions. Include an answer key with explanations and source citations for every answer.

Save as Note: **NOTES_U[#]_Practice_Quiz**

Phase 3 — Cross-Unit Review Prompts

RUN AFTER ALL UNITS
COMPLETE · IN ORDER

Do not start Phase 3 until every unit has all 7 notes saved. These prompts synthesize across all units — they only work when the full set of NOTES_U[#]_ files exists.

1

MASTER CONCEPT MAP

NotebookLM

→ Paste into: NotebookLM chat

Using all NOTES_U[#]_Key_Concepts notes across every unit, build a master concept map for the full course. Identify:

1. The 5-10 core themes that run through multiple units
 2. How each unit connects to the ones before and after it
 3. Concepts introduced early that become more complex later – trace that progression explicitly
 4. Any unit that stands largely alone – flag for independent study
- Format as a structured outline with units as branches and shared themes as the trunk.

Save as Note: REVIEW_Master_Concept_Map

2

MASTER GLOSSARY

NotebookLM

→ Paste into: NotebookLM chat

Using all NOTES_U[#]_Glossary notes across every unit, compile a master glossary for the full course. For each term:

- Keep definition and priority rating from the unit note
- Add a UNITS field showing every unit the term appears in
- If a term appears in multiple units, write one sentence on how its meaning or application evolves across units
- Flag any term that is HIGH priority in two or more units

Sort alphabetically. Add a CROSS-UNIT HIGH PRIORITY section at the end listing only the multi-unit HIGH terms.

Save as Note: **REVIEW_Master_Glossary**

3

MASTER FORMULA SHEET

NotebookLM

Skip if the class has no formulas.

→ **Paste into:** NotebookLM chat

Using all NOTES_U[#]_Formulas notes, compile a master formula sheet for the full course. For each formula: expression, plain language explanation, which unit it comes from, any units where it reappears, connected vocab terms from REVIEW_Master_Glossary, and whether it appeared in any REF sample questions. End with a ranked list of formulas most likely to appear on a cumulative exam.

Save as Note: **REVIEW_Master_Formulas**

4

WEAK SPOT REPORT

NotebookLM

The most important output most people never think to run. Do not skip this.

→ **Paste into:** NotebookLM chat

Using all NOTES_U[#]_Extraction notes, compile a full weak spot report for the course. Include:

1. Every term flagged LOW priority or GAP in any unit – listed by unit
2. Any concept in REF sample questions with thin DATA coverage
3. Any unit with significantly more gaps than others – flag the entire unit as needing supplemental resources
4. The top 10 weak spots to address before the final exam

Be direct. Flag everything underserved in the materials.

Save as Note: **REVIEW_Weak_Spot_Report**

5

FINAL SLIDE DECK

NotebookLM

If NotebookLM offers to generate the actual slide deck, accept it.

→ **Paste into:** NotebookLM chat

Using REVIEW_Master_Concept_Map, REVIEW_Master_Glossary, and REVIEW_Master_Formulas, generate a full course slide deck outline:

- Slide 1: Course overview and core themes
- One section per unit: title slide, one slide per HIGH priority concept, one slide grouping MEDIUM priority concepts
- Cross-unit connections slide
- Master formula reference slide
- CROSS-UNIT HIGH PRIORITY terms slide
- Final slide: Top 20 things most likely on the final exam based on REF sources and cross-unit frequency

Save as Note: **REVIEW_Final_Slide_Deck_Outline**

6

CUMULATIVE STUDY NOTES

NotebookLM

→ **Paste into:** NotebookLM chat

Using all NOTES_U[#]_Study_Notes and REVIEW_Master_Concept_Map, write cumulative study notes for the full course. Requirements:

- Clear plain language – this is what I read the night before the exam
- Organize by core theme from the concept map, not by unit
- Cover every HIGH priority concept from every unit
- Where a concept evolves across units, explain that progression once
- Include all CROSS-UNIT HIGH PRIORITY vocab terms with definitions
- Reference formulas inline where they apply
- End with a one-page course summary: the 10 most important things to know walking into the final exam

Save as Note: **REVIEW_Cumulative_Study_Notes**

→ Paste into: NotebookLM chat

Using REVIEW_Cumulative_Study_Notes, REVIEW_Master_Glossary, REVIEW_Master_Formulas, and all REF sources, generate a full cumulative practice exam. Requirements:

- 80% multiple choice, 15% short answer, 5% essay
- Every unit must be represented – weight toward units with more REF coverage and higher cross-unit concept overlap
- All CROSS-UNIT HIGH PRIORITY terms must appear
- At least one formula application question per unit with formulas
- Essay questions must synthesize across at least two units
- Full answer key with explanations, model answers, essay rubrics, and source citations for every answer

Save as Note: REVIEW_Cumulative_Practice_Exam
